Functions and dysfunctions of the dopaminergic system in murine models of brain disease

ORE 10
Presentazione degli Ospiti (Ezia Guatteo)

ORE 10.15
*The role of Uptake-2 in controlling dopamine in the nigro-striatal pathway of the brain: A view from Downunder, Professor Janusz Lipski, Department of Physiology and Centre for Brain Research, School of Medical Sciences, University of Auckland, New Zealand.*

ORE 10.45
*From Traumatic Childhood to Cocaine Abuse: The Critical Function of the Immune System, Prof.ssa Valeria Carola, Researcher Assistant Professor Department of Dynamic and Clinical Psychology, University La Sapienza, Rome.*

11.15 *Functional modifications in VTA dopaminergic neurons in two mouse models of early life stress. Prof.ssa Ezia Guatteo, DISMEB, University of Naples Parthenope and IRCCS Fondazione Santa Lucia, Rome.*
